DINESH KUMAR M B

Full Stack Developer | MERN Stack | AI-Powered Applications

Chennai, Tamil Nadu | dineshkumarmannibrundha@gmail.com | 9092440520

Portfolio: https://dineshkumar-mb-portfolio.vercel.app/ | GitHub: github.com/dineshkumar-mb | LinkedIn: linkedin.com/in/dineshkumar-mb

Professional Summary

Full Stack Developer specializing in React.js, JavaScript, TypeScript, Node.js, Express.js, and MongoDB, with experience building production web applications, REST APIs, reusable UI components, and AI-powered SaaS solutions. Skilled in API integration, authentication, real-time collaboration, database management, workflow automation, and AI integrations using RAG and LLM APIs. Experienced in collaborating across frontend and backend development, debugging application issues, and delivering maintainable, user-focused software.

Technical Skills

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS
Backend and APIs: Node.js, Express.js, REST APIs, JWT Authentication, WebSockets
Databases and Queues: MongoDB, MySQL, Redis, BullMQ, PostgreSQL
AI and RAG: Gemini AI, OpenRouter, embeddings, vector databases, prompt engineering, OCR
Payments and Integrations: Cashfree, API Integration, n8n Workflow Automation
Tools and Practices: Git, GitHub Actions, Postman, Docker, Amazon S3, React Testing Library, Agile

Professional Experience

Full Stack Developer *Jun 2025 – Present*
Innotrat Labs

- Develop frontend features for InnoIDE, a MERN-based low-code industrial automation platform used by 50+ engineers.
- Built virtual-sensor simulation features to validate workflows without physical hardware, reducing validation cycles from hours to minutes for industrial automation use cases.
- Collaborate with backend engineers on REST API integration and Dyte real-time collaboration while implementing simulation and validation interfaces for the product.

Frontend Developer *Jul 2022 – Jun 2025*
Neelan Oxysoft Pvt Ltd

- Developed and maintained business web applications using HTML5, CSS3, Bootstrap, and JavaScript, delivering responsive interfaces aligned with business requirements.
- Created reusable UI components and standardized frontend patterns to improve consistency, simplify maintenance, and support faster feature delivery.
- Collaborated on application enhancements and UI integration, resolving frontend issues to improve usability and cross-browser compatibility.

Projects

AI Career Intelligence and LinkedIn Content Agent
Technologies: React.js, Node.js, Express.js, MongoDB, Gemini AI, OpenRouter, Redis, BullMQ
Description: Developed an AI-driven content workflow that researches trends, analyzes profile positioning, and generates LinkedIn content aligned with professional themes. Integrated scheduled publishing and background job processing to coordinate recurring tasks, with Redis and BullMQ supporting queue management and retries.
Outcome: Automated scheduled publishing and added queue-based retries to improve execution reliability.

AI-Powered EMI and Loan Intelligence Platform
Technologies: React.js, Node.js, MongoDB, Gemini AI, OCR, RAG, vector embeddings, Redis, BullMQ
Description: Built a loan-intelligence workflow combining retrieval-augmented generation (RAG) with loan-policy documents and OCR-based extraction from bank statements. Used embeddings and vector retrieval to ground responses in relevant policy content, and background jobs to coordinate scheduled processing and EMI reminder workflows.
Outcome: Grounded responses in retrieved policy content, supported three bank-statement formats, and queued WhatsApp EMI reminders.

TaskFlow – AI-Powered Sprint Management SaaS
Technologies: React.js, Node.js, Express.js, MongoDB, Groq API, OpenRouter, Gemini AI, Cashfree, n8n
Description: Built a Jira-inspired sprint management platform with project and sprint workflows, role-based access control, subscription tiers, notifications, and AI function-calling capabilities. Integrated AI providers to interpret natural-language requests and trigger supported backend operations, with n8n workflows for automation and Cashfree for recurring subscription payments.
Outcome: Integrated Cashfree recurring payments and natural-language commands that trigger backend operations.

Education

B.E. in Mechanical Engineering, Pavai College of Technology, Tamil Nadu 2011 – 2015 | CGPA: 7.4

Certifications

GUVI – MERN Stack Development (2024) | Anthropic Academy – Claude Platform 101, Claude Code 101, Claude Code in Action, Introduction to MCP, MCP: Advanced Topics, Introduction to Agent Skills, AI Fluency Framework and Foundations

Additional Experience

Web Development Training, Livewire Dec 2021 – May 2022
Senior Accountant, Sri Renuka Devi Silks [Pasuth] Jan 2018 – Nov 2021
Sodexo Dec 2017 – Jan 2018
Caregiver *Dec 2016 – Dec 2017*
Production Trainee, Sungwoo Hitech May 2015 – Nov 2016
