

Dinesh Kumar Manni Brundha

Full Stack Developer (MERN) — React Specialist — AI-Powered Application Builder
Salem, Tamil Nadu, India — +91-9092440520
dineshkumarmannibrundha@gmail.com

LinkedIn — GitHub — Portfolio

Professional Summary

Full Stack Developer with 3+ years of experience building React.js and MERN-stack applications. Experienced in developing scalable web applications, AI-powered SaaS products, workflow automation systems, and fintech solutions using Node.js, MongoDB, REST APIs, RAG, OpenAI, and Gemini AI.

Technical Skills

Frontend: React.js, Redux Toolkit, React Router, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, MongoDB, MySQL

Cloud (Foundational): AWS EC2, Docker, Git, GitHub Actions, CI/CD

AI & Automation: RAG, Gemini API, OpenAI API, AI Agents, OCR, Prompt Engineering, n8n, Workflow Automation

Core: JavaScript, SQL, DSA, Design Patterns, System Design

Professional Experience

Full Stack Developer — Innokrat Labs

Jun 2025 – Present

- Developed workflow visualization and simulation modules for InnoIDE, a MERN-based low-code engineering platform, enabling engineers to design and validate automation workflows through an interactive React-based interface.
- Improved platform maintainability and user experience by building reusable React components, integrating REST APIs, and optimizing frontend architecture using Redux Toolkit.

Frontend Developer — Neelan Oxysoft Pvt Ltd

Jul 2022 – Jun 2025

- Developed and maintained React.js-based business applications by integrating REST APIs and MySQL-backed services to support customer-facing workflows and operational processes.
- Accelerated feature implementation and improved code maintainability by building reusable UI components and collaborating with Agile teams on production releases.

Web Development Training — Livewire

Dec 2021 – May 2022

- Transitioned into software development through intensive training in JavaScript, HTML5, CSS3, and Bootstrap, delivering 10+ responsive web projects to strengthen frontend engineering fundamentals.

Senior Accountant — Sri Renuka Devi Silks

Jan 2018 – Nov 2021

Managed financial reporting, regulatory compliance, account reconciliation, and day-to-day business operations.

Family Caregiving Sabbatical

Dec 2016 – Dec 2017

Provided full-time family caregiving support while pursuing self-learning in web technologies and software development fundamentals.

Production Trainee — Sungwoo Hitech

May 2015 – Nov 2016

Supported production planning, quality assurance, process documentation, and manufacturing operations in an automotive component environment.

Projects

AI-Powered EMI Calculator (RAG Enabled)

React.js — Node.js — MongoDB — Gemini AI

Live Demo — Frontend — Backend

- Designed a retrieval pipeline that indexes loan and EMI policy documents and feeds the most relevant chunks into Gemini AI, grounding responses in actual policy text instead of relying on the model's general knowledge.
- Engineered the prompt structure and response parsing layer to return consistent, structured loan guidance, with fallback handling for cases where retrieval confidence is low.
- Built the core EMI/interest calculation engine in Node.js and connected it to a React.js interface, with MongoDB persisting user EMI schedules and chat history.

TaskFlow – AI-Powered Sprint Management SaaS

React.js — Node.js — MongoDB — OpenAI — Cashfree

Live Demo — Frontend — Backend

- Architected a Jira-inspired sprint management SaaS with role-based access control, subscription tiers, and Cashfree-based recurring billing.
- Implemented an OpenAI-driven chatbot that interprets natural-language commands (e.g., "create a task," "move sprint deadline") and maps them to backend actions via a structured function-calling layer.
- Orchestrated background workflows with n8n to automate sprint notifications and recurring task creation, reducing manual project-setup steps.

AI Code Reviewer

React.js — Node.js — Google Gemini API

Live Demo — Frontend — Backend

- Engineered a code analysis pipeline that sends submitted code to the Gemini API with a structured prompt requesting categorized feedback (bugs, code quality, performance, best practices), then parses the response into distinct sections for the UI.
- Handled variable-length and inconsistent AI output by enforcing a defined response schema in the prompt and validating it server-side before returning results to the frontend.
- Deployed the frontend on Netlify and backend on Render, exposing a REST API that decouples the review engine from the UI layer.

Education

B.E. Mechanical Engineering

2011 – 2015

Pavai College of Technology, Tamil Nadu

Certifications

Anthropic Academy Certifications (2026)

(click to verify)

Model Context Protocol: Advanced Topics • Introduction to Model Context Protocol • Introduction to Agent Skills • AI Fluency Framework & Foundations • Claude Platform 101 • Claude Code in Action • Claude Code 101
